# Ministry of Finance

# ANNUAL DEVELOPMENT COOPERATION REPORT OF ETHIOPIA ETHIOPIA FISCAL YEAR 2011 (G.C. 2018/19)

Ministry of Finance

# Foreword

I am pleased to present the Annual Statistical Bulletin on Development Cooperation of Ethiopia for the period EFY 2011 (8 July 2018 to 7 July 2019). It provides an overall overview of development cooperation, Official Development Assistance (ODA) flows to the country by all development partners, and ODA flows and contribution to different sectors.

According to Aid Management Platform data during the reporting period, USD 4.48 billion was committed and USD 4.24 billion was disbursed of which 94% of the disbursement was for projects implemented by the government. Although continued increase in external development financing is observed over the last decade, the Ethiopian economy requires a significant amount of additional financing.

In addition to the regular external resource mobilization, the recently launched Home-Grown Economic Reform (HGER) that aims to overcome the macro-economic imbalance, institutional and structural challenges through comprehensive and well-synchronized set of measures, requires 9 billion USD as additional financing over the next 3 years. The reform consists of structural changes aimed at removing business constraints, opening sectors to private sector competition, and enhancing transparency and accountability in State-Owned Enterprises, coupled with macroeconomic measures that will help in correcting imbalances and safeguarding financial stability whiles addressing sectoral issues. Close to USD 4 billion additional financings is under discussion from bilateral and multilateral sources. On top of securing this financing, the Ministry of Finance will strategically approach development partner to fill the resource gap.

Currently, development Partners are leveraging potential official Development Assistance (ODA) to mobilize other resources for sustainable development; to improve country's trade performance & integration into the world economy, and to mobilize domestic resources of the country to engage private sectors in the development process of the country. However, more must be done to meet the finance demand of the country to achieve middle income status by 2025.

This bulletin also presents 2018 Global Partnership Effective Development Cooperation (GPEDC) monitoring survey results and it indicates where progress has been made and where challenges remain, it also informs how government and development partners can strengthen our collective action towards the achievement of the GTP II and 2030 Agenda for Sustainable Development.

Finally on behalf of the government of Ethiopia, I would like to extend immense appreciation to all our development partners who have supported the development effort in the country.

Admasu Nebebe, State Minister, Ministry of Finance

# **Definition of Key Terms**

**Commitment** is the amount of resources committed on the date the agreement was signed.

Disbursement refers to actual receipt of funds.

Grant refers to transfers made in cash, goods, or services for which no repayment is required.

**Loan**, in this context, refers to concessional loan, which is also known as soft loan. A concessional loan contains at least a 35 percent grant element, which means that it has lower interest rate, longer grace and repayment periods than commercial loans.

**Project Support** is development intervention designed to achieve specific objectives within specified resources and designated implementation period, often within the framework of broader programme support.

**Programme support** is a development intervention that has longer time period and it involves multiple activities that may cut across sectors, themes and /or geographic areas.

**Ongoing program/project** is a programme/project status in which a financing agreement has been signed and is under implementation.

**Completed program/project** is a programme/project status that shows the end of the physical progress of programme/project.

**Closed program/project** is a programme/project status in which financial flows come to an end, and official closure procedures have been performed.

Aid fragmentation is the dispersion of small aid activities initiated by numerous donors within a given developing country.

**Aid proliferation** is the aid dispersion from the perspective of an individual development partner, how a partner's aid is spread over different sectors (or projects) within a given country.

**Disbursement-linked indicators (DLIs)** are indicators whose achievement triggers the disbursement of funding from development partners to the Government.

# **Executive Summary**

The Second Growth and Transformation Plan (GTP II) aims to transform Ethiopia into an industrialized carbon neutral middle-income country by 2025. The country has mainstreamed the sustainable development goals (SDGs) into GTP II. There is a strong linkage among the Climate Resilient Green Economy (CRGE), Sustainable Development Goals (SDGs) and GTP II. Ethiopia's Gross Domestic Product (GDP) is estimated to be around 96 billion USD in EFY 2011<sup>1</sup>(2018/2019). The share of agriculture sector to GDP has consistently declined, and stands at 35.9% in 2018/19. The share of the services sector to GDP, on the other hand, rose from 38.6% to 38.8% and the share of the industrial sector to GDP has reached 25.3% in 2018/19.

Achieving the Sustainable Development Goals in general and the targets under GPT II in particular requires fund and co-operation with development partners on an unprecedented scale. The GTP II plan envisioned to collect revenue of 479.1 billion birr and to cover 85% of expenditure from domestic sources, while 7.6% is expected to be covered from external sources and the rest from domestic borrowing. Hence, domestic resource mobilization capacity remains a key priority towards the achievement of GTP II targets and ensures the sustainable development of the country. Enhanced tax revenue mobilization is featured as one of the critical focus areas of the government. However, external resources mobilization still plays a key role in filling the gap between the domestic revenues and budgetary requirement.

During EFY 2011 reporting period USD 4.48 billion new resource was committed and USD 4.24 billion was disbursed. Out of which, USD 4.0 billion (94% of the total disbursement) was for projects implemented across different sector.

Disbursement through government, USD 4.0 billion, was made for 332 projects/programs by 37 development partners. It is equivalent to 4.1% of GDP and 11.9% of Gross capital formation<sup>2</sup>. Out of the total disbursement, the grant part accounted for 55% and concessional loans accounted for 39% while the remaining 6% was technical assistance. Disbursement has increased by 14.5% (USD 506 million) when compared to the previous year (USD 3.4 billion, EFY 2010). This was due to the World Bank Group (IDA) disbursement of USD 1.2 billion in the form of Development Policy Operation to

<sup>1.</sup> National Planning Commission, National Accounts, 2018/2019.

ODA/Gross Capital formation indicates reliance on ODA to support gross fixed capital formation (i.e new value added in an economy). It indicates the extent to which governments need external rather than domestic resources to fund growth-enhancing investments. Annex 3 provides trends of aid dependency indicators of the country.

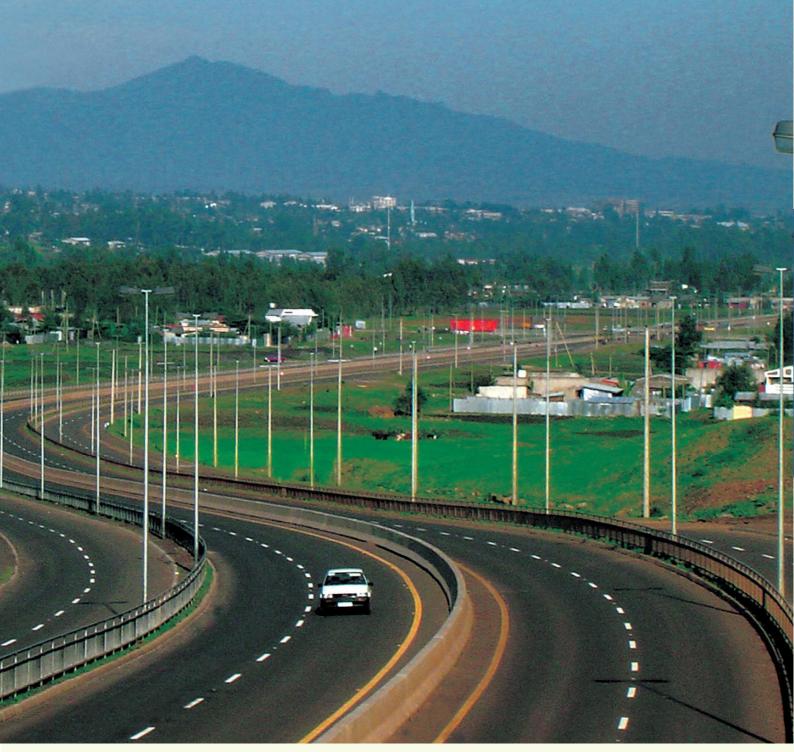

support the government reform among others. Out of the total disbursement made USD 1.9 billion or 48% was channeled through government treasury to support ten large government programs and 29.8% was disbursed in the form of General/Direct budget support.

This shows development partners move towards the use of government system, which shows improvements in aid effectiveness principle parameters. Disbursement to economic sector has improved; this is mainly due to IDA's Direct Budget Support. However, the overall disbursement to service sectors (health, education and water supply & sanitation), infrastructure sector (energy and transport), and multi sectors/cross cutting sector has declined during EFY 2011. The reasons for the decline in disbursement among others were due to partial fulfillment of DLI<sup>3</sup> of health sector budget support program (EU), Health SDG program (IDA), GEQUIP-E (IDA). In addition some projects entering completion phase such as: GEQUIP-E (IDA), TB and Malaria projects (GF); One WASH (DFID, ADB, Finland, UNICEF) limited the resources flow. Furthermore, Government decision to stop accessing non concessional sources also reduces the disbursement flow. The decision was based of the debt distress shift from moderate to high risk.

The 2018 Global Partnership for Effective Development Cooperation (GPEDC) monitoring result indicates that development partners registered good result in aligning and using country – led results framework, and both annual and Medium Term Expenditure Framework (MTEF) predictability results improved from 2016 GPEDC. However, it is still below the average for LDCs. Only 79% of the total funds were disbursed as planned and 54% of the total funds were reflected in the rolling 3-5 years expenditure plans shared with the government.

Generally, Development Partners are leveraging ODA to mobilize other resources for sustainable development; to improve the country's trade performance & integration into the world economy, to enhance domestic resources mobilization and engagement of private sectors in the development process of the country.

<sup>3.</sup> Disbursement-linked indicators (DLIs) are indicators whose achievement triggers the disbursement of funding from development partners to the Government (for the variable tranche element of development partner financing). The DLI matrix guides assessment of achievement of these DLIs. The matrix contains the annual results to be achieved by program year as well as the protocol that outlines the evidence that is required to demonstrate achievement.

# Introduction

Ministry of Finance is mandated by proclamation no 1097/2011 that defines duties and responsibilities of the Executive Body of FDRE, among others, to formulate strategies with a view of increasing the type and volume of foreign development assistance; negotiate and sign cooperation agreements and, in consultation with the concerned institutions, and subsequently follow up the implementation of projects/program over the course of their life. Thus, the Ministry of Finance is responsible for overall management and coordination of external development assistance in the country. In order to achieve this objective, currently, the external resource Mobilization team at MoF is headed by a State Minister which coordinates specialized directorates including: Bilateral, Ethio-China, European Union (EU), International Financial Institutions (IFIs) and United Nations (UN). The source of data for this bulletin is the Aid Management Platform (AMP) which exist since 2005 in the MoF and 2018 GPEDC monitoring report released by OECD-UNDP joint support team. This bulletin uses OECD/ DAC sector classifications. All amount indicated in this bulletin are expressed in United States Dollars (USD), unless otherwise noted.

To enhance the management of development assistance at the national level, the Government of Ethiopia in cooperation with its development partners established Aid Management Platform (AMP) in order to record external resources flow data in comprehensive and timely manner. AMP provides an easy access to users and generates up-to-date information which facilitates easy information sharing among stakeholders and ensures knowledge based decision making by government authorities and other stakeholders. The AMP system is contributing to effectiveness of aid, increase transparency and promote greater mutual accountability and ownership.

This Bulletin offers a comprehensive picture of Official Development Assistance (ODA) to Ethiopia in EFY 2011 (July 8/2018-July 7/2019). The data in this bulletin are presented in the form of tables and graphs under three major sections.

**Section 1:** Presents an overall overview of commitment from bilateral and multilateral development partners.

**Section 2:** Presents Disbursement by Development Partners and by Sectors. This section provides overall overview of disbursement made by bilateral and multilateral development partners and employs the OECD sector classification, and provides information about the specific areas into which resources flow.

**Section 3:** Reviews the collaboration between the Ethiopian government and development partners from development effectiveness agenda point of view.

This Statistical Bulletin can be used by many stakeholders including Development partners who can use this to identify sectors that might require further support in attaining Sustainable Development Goals (SDG) and the Growth and Transformation Plan II (GTPII) objectives. It is also expected that the information contained in this Bulletin will help researchers, government institutions, and non-governmental organizations in their analysis of the Official Development Assistance provided to Ethiopia.

The AMP data was used as a main source of information to validate 2018 GPEDC inputs from development partners, especially for indicator 1 and 5a<sup>4</sup>. However, for the next GPEDC monitoring, it requires to go beyond this, concrete effort should be made to ensure that the next GPEDC monitoring survey data is taken from AMP.

To this end, development partners on top of providing actual disbursement data they are required to provide annual planned disbursement, 3-5 year rolling future disbursement plan and to provide information regarding the use of country system and so on for each program/project under Global Partnership Indicator (GPI) section on AMP. Hopefully this will advance the quality of national report submitted to UNDP-OECD joint support team and helps to make GPEDC inputs from Development partners in more transparent manner which helps to avoid human error.

Unlike the previous years, the current bulletin has improved on the comprehensiveness of the development cooperation among other by including Global Alliance for Vaccines and Immunization (GAVI) and Global Fund (GF) commitment and disbursement information from the AMP system.

4. Indicator 1-development partners use country- led result framework and indicator 5a - annual aid predictability

# Commitment

1044.4830%27%Programs / ProjectsBillion USD<br/>Committed in<br/>EFY 2011For Agriculture<br/>sectorFor Agriculture<br/>budget support

During EFY 2011, twenty-seven development partners committed<sup>5</sup> a total amount of USD 4.48 billion to support implementation of 104 programs/projects, out of which 65 new and the rest 39 existing. Out of the total commitment, 59.3% was in the form of grant and 39.4% in the form of concessional loan and the remaining 1.4% technical assistance.

Bilateral and Multilateral institutions provided 30% and 70% of the total commitment respectively. Among the multilateral institutions IFIs accounted for 85%, of which WB (IDA) commitment of USD 1.26 billion was allocated for budget support ( Development Policy Financing). The WB(IDA) budget support financed the ongoing economic reform in the country. It is for the first time, after 13 years of stoppage, that development partners have started budgetary support to Ethiopia to assist the government on the ongoing reform work.

<b>IDA – 1.2 billion</b> (Aug 2018-Sep 2019)	Growth and Competitiveness Programmatic Development Policy Financing
<b>IDA – 500 million</b> (Apr 2019-Apr 2024)	Climate Action through Landscape Management (CALM) P4R

<b>IDA – 100 million</b> (May 2018- Apr 24)	Resilient Landscapes and Livelihood Program(RLLP)
KOICA- 94 million (Feb 2019-June 2024)	Ground Water Irrigation Development and Rural Development projet
iqure 1: Ton ten commitments cove	ring 69% of the total commitment of 2011 EFY (USD)

Figure 1: Top ten commitments covering 69% of the total commitment of 2011 EFY (USD)

5. Annex 2 provides commitments matrix during EFY 2011. It gives a broad indication of sectors and thematic areas where committed. The mapping helps for division of labor in the context of the aid effectiveness agenda.

The commitment made is expected to maximize finance for development; boost competitiveness through a better environment for the private sector; and enhance public transparency and accountability to promote good governance in order to mobilize private investments through Public Private Partnerships (PPP); reform the power sector to prepare for more private participation and competition; reform the logistics sector to reduce costs and improve efficiency through private sector participation and competition; reform the telecom sector to improve connectivity to prepare for more private participation and competition; improve the investment climate to foster private sector growth; take steps towards modernizing the finance sector to meet the needs of a growing private sector; ensure the proper functioning of the government bond market and foreign exchange market; promote citizen information and participation; and improve public enterprise management, transparency and accountability.

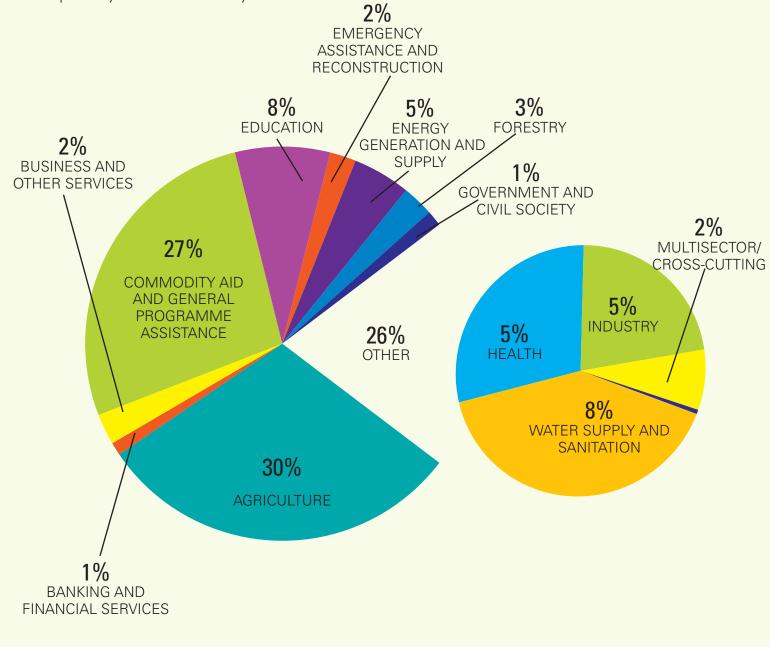

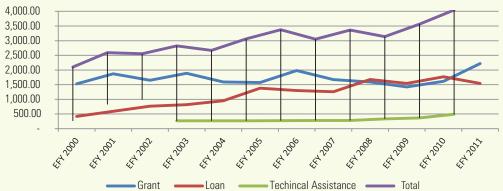

Figure 2: Distribution of Commitment by Sector EFY 2011

# Disbursement

## **Disbursement by Development Partners to government**

During EFY 2011, 37 development partners disbursed a total of USD 4.0 billion for 332 projects implemented by the government across multiple sectors throughout the country. This shows an annual increase of 14.5% (USD 506 million) when compared to the previous year (USD 3.4 billion). The disbursement during the year was 4.1% of GDP or is equivalent to 11.9% Gross capital formation<sup>6</sup>. Out of the total disbursement, grant accounted for 55% and loans accounted for 39% while the remaining 6% was technical assistance.

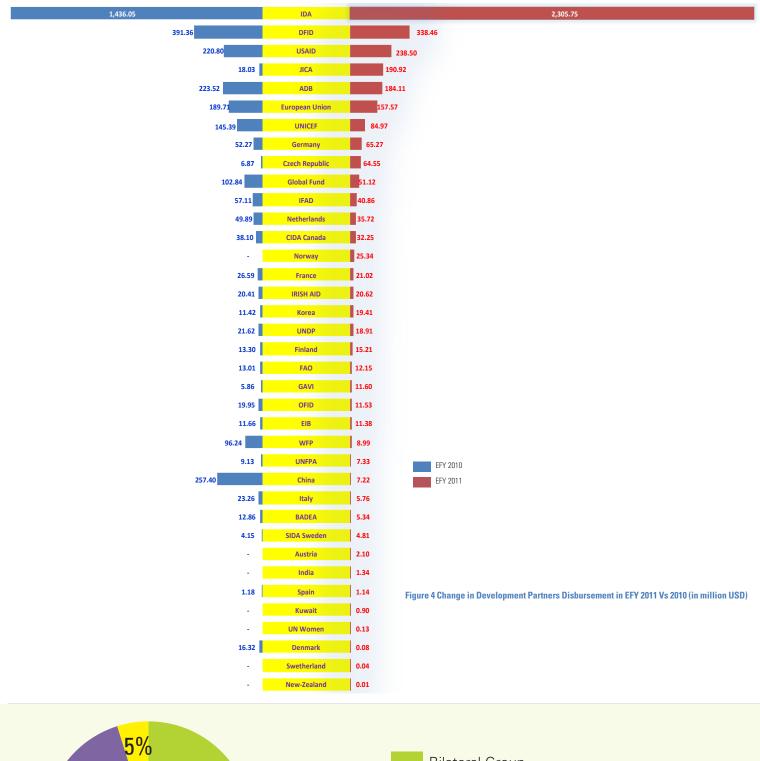

The share of grant has been in declining trend until end of EFY 2009, then after it has started increasing, in EFY 2011 the share disbursement in the form of grant has increased to 55% from 46% in EFY 2010. Similarly, the share of loan has decreased to 39% from 51% in the previous year. The increase in disbursement during 2011 was mainly due to disbursement of USD 1.2 billion to development policy financing project by IDA among others.

During the reporting period, 20 development partners have reduced their disbursement for the projects implemented by government institutions while 17 development partners have increased when compared to disbursement performance of last year (2010). The comparising is shown in the next figure.

<sup>6.</sup> ODA/Gross Capital formation indicates reliance on ODA to support gross fixed capital formation (i.e new value added in an economy). It indicates the extent to which governments need external rather than domestic resources to fund

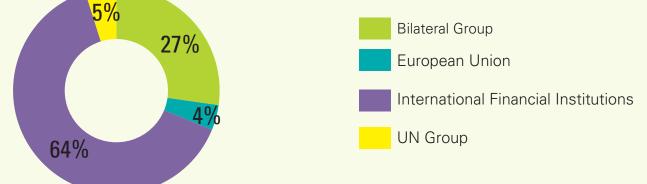

Figure 5: Distribution of Disbursement by Development Partners Group During EFY 2011(in million USD)

Multilateral and Bilateral development partners disbursed USD 2.9 billion (73 %) and USD 1.1 billion (27%), for the implementation of 161 and 171 projects/programs, respectively.

Out of the total disbursement of bilateral partners USD 574.7 million (53%) was from EU member bilateral partners while USD 515.9 million from non-EU member bilateral partners. Disbursement from non-EU member bilateral partners decreased by USD 30 million (5.4%) when compared to the previous year. The sum of disbursement from EU member bilateral partners & European Union was USD 732 million that decreased by USD 63 million (8%) as compared to previous year.

- European Union contributed USD 157.6 million (4% of the total), its disbursement increased by 62% (USD 17 million) from the previous year.
- International Financial Institutions disbursed USD 2,558.9 million (61% of the total), which increased by 45% (USD 797.8 million) when compared with EFY 2010.
- UN Agencies disbursed USD 195.2million<sup>7</sup> (5% of the total) which decreased by 5% (USD 199 million) from the previous year.

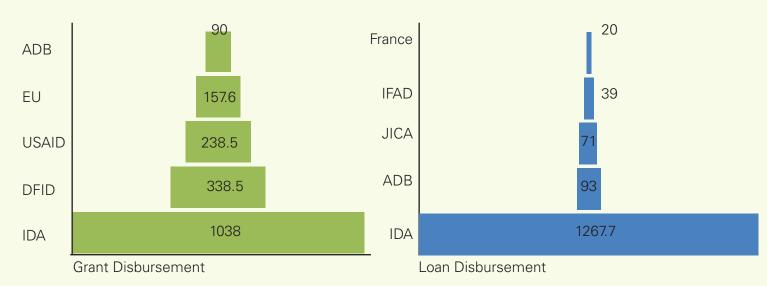

Figure 6: Top Five Development Partners during EFY 2011( amount in million USD)

USD 1.9 billion or 48% of the total development assistance was channeled through government treasury for ten large government programs. These include: Growth and Competitiveness Development Policy Financing (USD 1.2 billion), Enhanced Shared Prosperity through Equitable Services (ESPES) (USD 147 million), Productive Safety Net Program (PSNP) (USD 246.5 million), General Education Quality improvement Program (GEQIP) (USD 45.6 million), Urban Productive Safety Net Program (UPSNP) (USD 88.3 million), Land Investment Transformation Program (LIFT) (USD 15.8 million), Health Sector Budget Support (HSBS) (USD 33.6 million), Water, Sanitation and Hygiene Program (WASH) (USD 48.5 million), Basic Service Transformation (BST) (USD 84.3 million) and Public Finance Management program (PFM) (USD 5.2 million). Out of the total disbursement through government system 29.8% was for General/Direct budget support.

### **Disbursement by Development Partners to Non-Governmental Organizations**

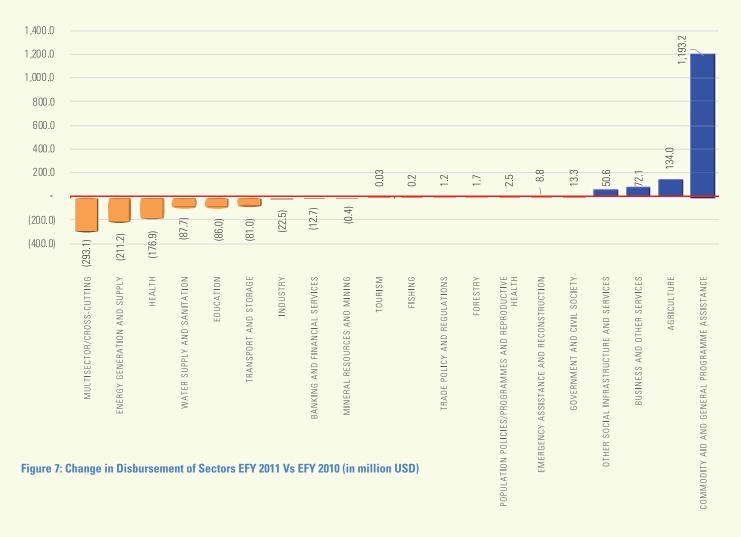

During EFY 2011 development partners disbursed USD 241 million through Non-Governmental Organizations<sup>8</sup>, 68% of which was for humanitarian related programs while the rest 32% for development programs. Please refer to annex 5 to see development partners' disbursement through NGOs.

<sup>7.</sup> This figure doesn't include the USD 18.3 million resources that UN agencies mobilized locally from bilateral donors to implement projects.

<sup>8.</sup> Disbursement through non-governmental organization here refers disbursement made by development partners in the country for projects implemented signed with non-governmental organization at country level. It doesn't refer disbursement to NGO or IGO from HQ, charity organization and so on.

### **Disbursement by Sectors**

EFY 2011 performance indicates that disbursement to economic sector<sup>9</sup> has improved. This is mainly due to IDA's Direct budget support. However, the overall disbursement to service sectors (health, education and water supply & sanitation), infrastructure sector (energy and transport), and multi sectors/cross cutting sector has declined during EFY 2011. The reasons for the decline in disbursement among others were due to partial fulfillment of DLI<sup>3</sup> of health sector budget support program (EU), Health SDG program (IDA), GEQUIP-E (IDA). In addition some projects entering completion phase such as: GEQUIP-E (IDA), TB and Malaria projects (GF); One WASH (DFID, ADB, Finland, UNICEF); limited the resources flow. Furthermore, Government decision to stop accessing non concessional sources also reduces the disbursement flow. The decision was based of the debt distress shift from moderate to high risk.

Development Partners are leveraging ODA to mobilize other resources for sustainable Development.

For instance,

- To improve the country's trade performance and integration into the world economy, Denmark, European Union, IDA and UNDP has disbursed million USD of 0.07, 2.4, 3.7, and 0.03 respectively during the reporting period.
- **To enhance domestic resource mobilization of the country** DFID has provided financial assistance of 0.24 million USD to transform tax administration and tax policy capacity of the country in order to increase tax revenue, improve the business operating environment, ensure tax does not overburden the poor, and improve compliance in relation to the tax system.

9. Economic sector refers to sectors like Agriculture, Banking and Financial Institutions, Business and other services, Commodity Aid and General Program Assistance, Emergency Assistance and Reconstruction, Forestry, Industry, Mineral Resources and mining services, Trade policy and Regulation.

- To enhance engagement of the private sectors in the development process of the country, CIDA Canada, DFID, European Union and IDA have disbursed million USD of 1.3, 13.4, 11.3, and 37.8 respectively. The objective is to increase access to finance for eligible small and medium enterprises (SMEs) in the country. In addition to this, ADB has disbursed USD 0.01 million for Institutional Support Project for Public-Private-Partnerships (ISP-PPP) with the overall objective of supporting the Government of Ethiopia to sustain economic development and inclusive growth through enhanced private investments in economic and social infrastructure. This is particularly to create an enabling environment and build the requisite capacity for private sector participation in infrastructure as a means of boosting private investments in the delivery of infrastructure and other public services for enhanced competitiveness and inclusive growth.
- USD 168 million was disbursed by development partners<sup>10</sup> to support environment in EFY 2011, which is in line with the SGD 13<sup>11</sup> and GTP II. Tackling climate change is one of the top priorities of the country goal towards reaching lower middle income country status through green path by 2025. Encouraging progress and performances have been achieved in terms of mainstreaming climate change objectives into national development plan and delivering desired results in the last few years. Yet lots of work remains to strengthen this effort and ensure achievement of long term goals and sustainability of these success stories.

The CRGE strategy recognizes the necessity of holistically addressing development and climate objectives. It focuses on four key areas:

- improving crop and livestock production practices for higher food security and farmer income while reducing emissions;
- protecting and re-establishing forests for their economic and ecosystem services, including as carbon stocks;
- expanding electricity generation from renewable sources of energy for domestic and regional markets; and
- Advancing to modern and energy-efficient technologies in transport, industrial sectors and buildings.
- USD 81.5 million was disbursed to support gender equality in the country in EFY 2011. Support for gender equality is one of the priority cross cutting issues that development partners are support the goverment effort

# Public Private Partnership (PPP)

The Ethiopian economy requires a significant amount of additional financing despite a continued increase in external development financing. International Development Cooperation is one of the focus areas to implement the home grown reform agenda. Mobilizing resource for the economic reform agenda requires an integrated mix of leveraging traditional source of financing and identifying new ones. Blended finance is one important approach to mobilize new sources.

The Ministry of Finance has designed and started implementing the Public Private Partnership program to realize the government's partnership with the private sector, which is new in its kind for the country. Thus, to fill the gap in infrastructure financing, the government has started involving the private sector in partnership with the government. Currently, PPP framework has started being implemented and two solar projects, Gad and Dicheto, each with total cost of USD 150 million are signed to be implemented in Somali and Afar region.

11. SGD 13- Take urgent action to combat climate change and its impacts.

<sup>10</sup> The disbursement includes funds disbursed for bilateral CRGE project/program implementation (include funds which didn't channel through MOF for CRGE project implementation.)

A lot of achievements are registered through development cooperation in the country. This section presents achievements in one of the pool fund program, Water, Sanitation, and Hygiene, which is in line with SDG 6: Ensure availability and sustainable management of water and sanitation for all.

One WASH National Program (OWNP) is one of the multi donor funded projects. It is financed by the Government of Ethiopia and Development Partners (AfDB, DFID, World Bank, UNICEF and Finland) . The program integrates: MOH, MOE, MOWE and MoF. A total budget of USD 487.2 million was allocated for the period EFY 2007 to EFY 2011 (9.5 % from government and 90.5% from development partners).

The program development objective is "Increased access to improved water supply and sanitation services for residents in participating Woredas, towns and communities in Ethiopia". It advocates for one plan, one budget, one reporting system and

one Consolidated WaSH Account. The program has four components:

- I. Rural WaSH,
- II. Urban WaSH,
- III. Institutional WaSH and
- IV. Program management and capacity building

During the five year period, EFY 2007-2011:

 Under Rural WASH component for Safe Rural Water Supply - a total of 17,335 water supply schemes were constructed (15,089-new, 214-expansion and 2032- rehabilitation). This has provided access to safe water to 3.9 rural people and for Sanitation and Hygiene- 1,946,659 HH's latrines constructed (1,221,638-new and 725,021- rehabilitation), which has benefited 9.3 million rural communities.

Under Urban WASH component

- 37 small towns water supply system is constructed (369,140 individuals are benefited), additional 48 are under construction and 32 under design stage.
- 2 medium towns water supply system is constructed (74,200 peoples are benefited), additional 8 are under construction and 10 on design.
- 379 public & communal latrines (199 public & 180 communal) constructed. 71,146 and 6746 people are benefited from public and communal latrine respectively.

Under Institutional WASH

- 3,440 sanitary facilities and 1,756 water supply facilities constructed for schools.
- A total of 3,108 latrine and 1,920 water supply facilities is constructed for health centers/posts

As the first joint program in WASH area ,OWASH phase I has registered good result with the challenges faced in the course of project implementation. The program is extended until EFY 2012( 2019/2020) to complete the remaining activities.

Focusing challenges and lessons of OWASH Phase I program and directives and indicators of GTP II, OWASH phase II is on preparation. The new Program looks beyond GTP II to establish sector reform and towards meeting SDGs by 2030. The long-term objective of OWNP Phase II is to achieve universal, sustainable, climate resilient and equitable access to safe and affordable water for all along with improved, low environmental impact, sanitation by 2030. The short-term objective of the Program is to achieve increased and sustained coverage of water supply and sanitation in rural and urban areas with basic Water supply and Sanitation (WSS) service levels in Ethiopia in line with the GTP II targets.

# **Aid Effectiveness**

The Global Partnership for Effective Development Co-operation (GPEDC) is a unique multi-stakeholder platform to advance the effectiveness of development efforts by all actors in delivering results that are long-lasting and contribute to the achievement of the SDGs, including the commitment to leave no one behind<sup>12</sup>.

GPEDC monitoring survey supports in tracking the implementation of effective development co-operation commitments, aimed at implementing four development effectiveness principles – country ownership, focus on development results, inclusive partnerships and enhancing transparency & mutual accountability.

Ethiopia is one of the 86 countries that voluntarily participated in 2018 GPEDC monitoring survey. The exercise is carried out for the 3rd time. About 30 Development Partners<sup>13</sup> that have development cooperation in the country, including one philanthropic institution have provided their input at national level. The results of the monitoring survey are presented in the next section. The result indicates where progress has been made and where challenges remain. It also informs how governments and their partners can strengthen their collective action towards achievement of the GTP II and 2030 Agenda for Sustainable Development.

## **Focus on Result**

The Government has prepared its GTP II in line with Sustainable Development Goals (SDGs) and Agenda 2063 to achieve its goal of reaching middle – income status by 2025. This continues to guide development partners' support and engagement with Government in order to ensure that no one is left behind.

Country's leadership in establishing and defining its own results frameworks, and monitoring and evaluation systems are fundamental aspects of the principles of country ownership and results orientation<sup>14</sup>. 2018 GPEDC result<sup>15</sup> indicates that the quality of national development plan of Ethiopia is 95%, which is high when compared to LDCs (79%). High quality, inclusive and results-oriented development strategies are critical for a country ownership over its development and the implementation of the 2030 Agenda and the Sustainable Development Goals (SDGs).

The government strategic plan defines government priorities, has targets and associated indicators, includes budget information and has annual progress report. The plan aligns with SDGs, it is referenced at strategic, goal and target level but not at indicator level. 2018 GPEDC Monitoring Survey Results

**95%** Quality of national development plan

**79%** Total funds disbursed as planned

> **31%** Use of Country System

Development partners' interventions alignment

**54%** 3-5 year expenditure plans shared with the government

<sup>12.</sup> Source 2018 GPEDC guideline

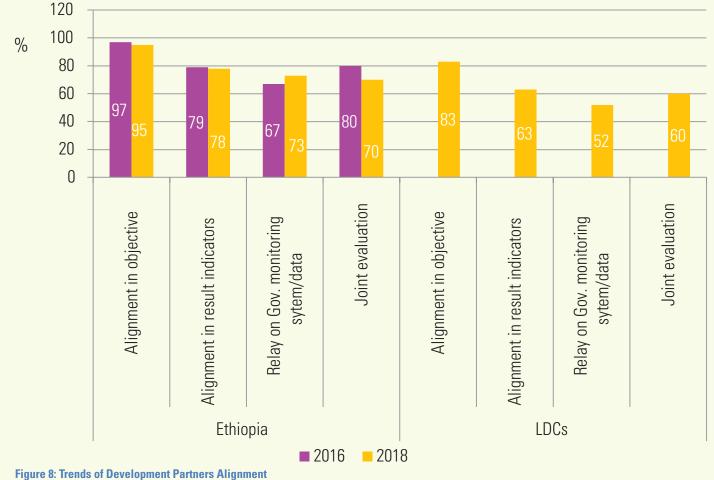

<sup>13.</sup> Annex 6 provide list of development partners that participated in 2018 GPEDC monitoring exercise by providing their respective agency input at national level.

<sup>14.</sup> OECD-UNDP,2016

<sup>15.</sup> http://effectivecooperation.org/monitoring-country-progress/country-and-territory-monitoring-profiles/ provides 2018 GPEDC result

The overall, development partners interventions alignment with the country priorities and countryowned results frameworks is 82%, which is above the average result for LDCs (66%).

- 83% of development partner's interventions objectives were drawn government results frameworks, it is • above the LDCs score (83%) 97% 2016
- 78% of result indicators were taken from country result framework, it is above the LDCs score (63%)—79% in 2016
- 73% of indicators relay on data provided by country monitoring system, it is above the LDCs score (52%)-67% in 2016
- 70% of interventions evaluation is joint evaluation with government, it is above the LDCs score (60%)-80% in 2016

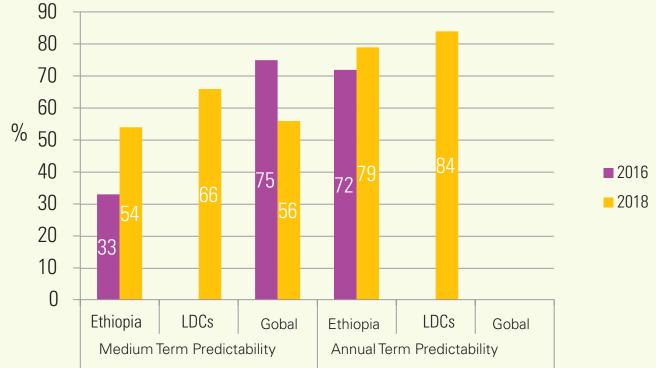

**Ownership of development priorties by the government-** partnership for development can only succeed if it is led by the government.

## Forward visibility of development Partners

Predictable development co-operation could help government to plan and manage its development policies and programs with better effectivess. The 2018 GPEDC result indicates that:

- 79% of the total funds were disbursed as planned, the result is below LDCs but has improved when compared to 2016 result.
- 54% of the total funds were reflected in the rolling 3-5 year expenditure plans shared with the government. The result is below LDCs and global result but has improved when compared to 2016 result.

**Figure 9: Development Partners Annual and Medium Term Predictability** 

The result indicates that development partners need to make further effort to provide forward looking information on development cooperation to create conducive environment for planning and budgeting of the country.

## Development partner's use of country system

The overall use of country public financial management and procurement systems has declined. Ethiopia has registered an overall decrease in the three elements measured by this indicator: financial reporting; national auditing; and use of national procurement systems. An average of 31% of total ODA used the country's PFM and procurement systems compared to 45% in 2018 and 51% in 2013. The 31% total use of country systems represents an average of the 4 elements listed below.

- Budget execution is 43% it is below LDCs (49%) but improved compared to 2016 result (25%).

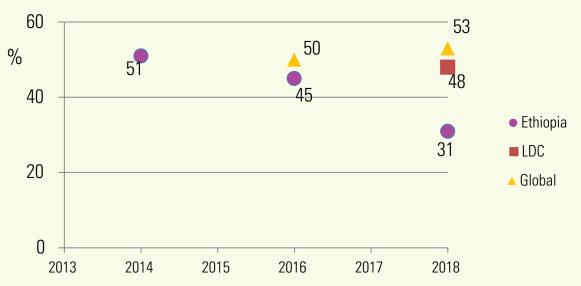

Figure 10: Trend of Development Partners Use of Country System

- Financial Reporting is 26%, it is below LDCs (46%) and declined from 2016 result (42%)
- Auditing is 32% and it is below LDCs (52%) and has declined from 2016 result (76%)
- **Procurement System** is 24%, it also below LDCs (45%) and has declined from 2016 result (33%)
- Transparency and Mutual Accountability

Mutual accountability underpins the efforts of development actors to meet joint commitments, improve how they work together, and increase their development effectiveness. Mutual accountability mechanisms are made up of multiple, reinforcing components that can help enhance transparency and accountability at country level.

- Ethiopia is not considered to have effective inclusive mutual assessment reviews<sup>16</sup>. As per the result of 2018 GPEDC monitoring, among the five components which characterizes the presence of inclusive mutual assessment reviews in the country: (i) a policy framework that defines the country's development co-operation priorities; (ii) targets for the country and its development partners; (iii) regular joint assessment against those targets; (iv) active involvement of other stakeholders; and (v) public availability of the results of these reviews, only two components are in place: inclusive assessments, which involve non state actors and on time & publicly availability of results of assessments.
- Ethiopia is approaching to meet indicator 8: countries have systems to track and make public allocations for gender equality and women's empowerment (sdg 5c). The country has met or put in place two criteria: the presence of gender polices and transparent information on resources allocation. It remains a concrete effort to meet the third criteria, the presence of gender responsive PFM system.
- Additionally, 71% of development partners<sup>17</sup> report through one or more of these systems and aid management system is in place.
- The share of development co-operation recorded on budgets subject to parliamentary scrutiny decreased from 63% in 2016 to 44%<sup>18</sup> in 2018. The full inclusion of development co-operation flows on the approved national budget facilitates scrutiny by parliaments and accountability to the public, allowing for greater national ownership of development efforts. This indicator also serves as an indication of whether development partners and governments are effective in linking development co-operation with domestic policies and programmes.

- 18. Where the funds recorded in the partner country's budget are smaller than the disbursements planned by its development partners at the outset of the reporting year of reference, the indicator is calculated by dividing the funds recorded in the budget by the funds scheduled for disbursement.
- Where the funds recorded in the budget are larger than the scheduled disbursements, the indicator is calculated by dividing the difference between recorded and scheduled by the funds recorded in the budget. This value represents what is beyond schedule

<sup>16.</sup> A country is considered to have effective mutual assessment reviews in place when at least four out of five key elements are present.

<sup>17.</sup> it is calculated by dividing the number of development partners working in the country that are reflected in a country's management information system or other data management tools by the total number of development partners working in the country
